Who we are

Established in 2000, the UHI serves as an interface between Johns Hopkins University and the Baltimore community in which it resides. Together with its university and community partners, the UHI explores ways that the research, teaching, and clinical expertise of the University can be better harnessed for the benefit of the residents of Baltimore.

Our Mission

To serve as a catalyst that brings together the resources of Johns Hopkins Institutions with the City of Baltimore, to improve the community's health and well-being, and in so doing serve as a model of community-university collaboration regionally and nationally.

We would like to acknowledge the contributions from the Community-University Coordinating Council and community planning meeting participants in helping to shape the symposium.
